JOURNAL OF GEOCHEMICAL EXPLORATION

VOLUME 55 NOS. 1-3 SPECIAL ISSUE

GEOCHEMICAL EXPLORATION 1993

Edited by

Yvon T. Maurice and Xie Xuejing

CONTENTS

Preface vii

Plenary session lectures

Challenge of environmental problems in China and our response
Qu Geping 1

International geochemical mapping — a review
A.G. Darnley 5

Regional geochemical secondary negative anomalies and their significance
Shi Changyi and Wang Caifang 11

Primary geochemical anomalies in the Caijiaying Pb–Zn–Ag deposits, Hebei, China
Liu Chongmin and Xu Waisheng 25

Assessment of geochemical anomalies for gold exploration using lead isotopes in west Hainan, China
Huang Bin 33

A rapid field analytical method for gold in geochemical exploration
Lu Yinxiu and Wang Xiaoling 49

Separating anthropogenic from natural anomalies in environmental geochemistry
O.S. Selinus and K. Esbensen 55

Regional to detailed geochemical mapping of the Kariisk ore district, eastern Trans-Baikal region, Russia
A.M. Spiridonov and V.A. Gnilusha 67

Direct determination of 25 elements in dry powdered plant materials by X-ray fluorescence spectrometry
Li Guohui and Fan Shouzhong 75

Application of limited fuzzy clusters to anomaly recognition in complex geological environments
U. Kramar 81

Concepts for geochemical gold exploration based on the abundance and distribution of ultrafine gold
Wang Xueqiu, Xie Xuejing and Ye Shengyong 93

Characteristics of element dispersion and geochemical exploration for concealed ore deposits overlain by loess and red soil in eastern Gansu Province, China
Ren Tianxiang, Yang Shaoping and Liu Yinghan 103

Introduction to the program "Multipurpose Geochemical Mapping of Russia"
P.V. Koval, E.K. Burenkov and A.A. Golovin 115

The use of geochemical indicator elements in the exploration for hot water sources within geothermal fields
Zhu Bingqiu and Yu Hui 125

Correspondence cluster analysis and its application in exploration geochemistry
J. Hongjin, Z. Yongzheng and W. Xisheng 137

Scintillation emission spectral analysis (SESA) — the method of choice for mass analysis of geochemical samples for gold and PGEs
A.L. Kovalevskii and S.I. Prokopchuk 145

Wide-spaced sampling of humus in Fennoscandia
K. Lax, P. Edén and A. Björklund 151

Impact of acid sulfate soils on stream water geochemistry in western Finland
M. Åström and A. Björklund 163

The mapping of geochemical provinces in China based on Pb isotopes
Zhu Bingquan 171

(continued on p. vi)

Contents (continued)

Geochemical characteristics affecting the cultivation and quality of Longjing Tea
Zhou Guohua, Zhu Lixin, Ren Tianxiang, Zhang Liansheng and Gu Jinqiu 183
Environmental geochemical mapping and assessment of anthropogenic chemical changes in the Irkutsk–Shelekhov region, southern Siberia, Russia
G.A. Belogolova and P.V. Koval 193
Hydrothermal processes and shifting element association patterns in the W–Sn enriched granite of Regoufe, Portugal
P.F.M. Van Gaans, S.P. Vriend and R.P.E. Poorter 203
Effect of soil pH on Al availability in soils and its uptake by the soybean plant (*Glycine max*)
D. Dong, M.H. Ramsey and I. Thornton 223
Representativity of wide-spaced lower-layer overbank sediment geochemical sampling
Shen Xiachu and Yan Mingcai 231
δ^{37}Cl variations in selected minerals: a possible tool for exploration
H.G.M. Eggenkamp and R.D. Schuiling 249
Stream water, an ideal medium for rapidly locating polymetallic mineralization in forest–swamp terrain: a case study in the Da Hinggan Mts., northern Heilongjiang, China
Wang Mingqi, Ren Tianxiang, Liu Yinhan and Liu Shuxing 257
Environmental geochemistry in development planning: an example from the Nile delta, Egypt
F.R. Siegel 265
Integrated radiometric prospecting for petroleum in the Kailu Basin, Inner Mongolia, China
S. Zhongjun, Z. Bingqiu, D. Guangtong, Y. Hui, W. Wei and L. Haisheng 275
EPR spectra and lithogeochemistry of jasperoids at Carlin, Nevada: distinction between auriferous and barren rocks
J.C. Van Moort, M.A.C. Hotchkis and . Aung Pwa 283
Use of a sensitive analytical method and the silt–clay (<53 μm) fraction of stream sediments in exploration for gold in northern Thailand
W.K. Fletcher, R. Lahiri, B.L. Caughlin and H. Blok 301
Geochemical exploration for concealed nickel–copper deposits
Li Yinggui, Cheng Hangxin, Yu Xuedong and Xu Waisheng 309
Geochemical mapping and databases in Finland
R. Salminen and T. Tarvainen 321
Ideal models of superimposed primary halos in hydrothermal gold deposits
Li Hui, Wang Zhinong and Li Fuguo 329
